

## APHANISIS

I wake up at the center  
of the universe

my navel  
stone, my blood way

I wake up  
handcuffed to a chair

with double-vision I  
river my wherever

a slab of Erasmus  
humming

my insides cranking  
upwards, cruel

a windlass dissolves  
intestiniform

Houdini entrails, my telescope  
*A, why have you forsaken me?*

I ask the sky  
*Is Fury justified?*

I no longer  
desire A

ANEMOI

the wind holds  
me *nth*

*you held me*  
*once*

A held me  
*onth*

screamed  
into me

month after  
month

muffled  
high-pitch

a folded back  
hyacinth

## A'S SONG

*Athena,  
my stage name  
miasma  
my Clytemnestra  
my waste  
I am coming  
outside of  
myself  
no justice  
just sap  
your motto  
another arrow  
your asp  
my, my  
you came into  
my dressing room  
guns blazing  
ready to take  
aim  
ready to  
dissemble  
my owl*
